

第六週-練習三

11127138

林雨臻

1. 請以 `background job` 方式執行 `sleep 20000`。

```
[s11127138@localhost ~]$ sleep 20000&
[1] 5413
[s11127138@localhost ~]$ jobs -l
[1]+  5413 Running                  sleep 20000 &
[s11127138@localhost ~]$
```

2. 請將前題的 `job` 暫停執行。

```
[s11127138@localhost ~]$ kill -19 5413

[1]+  Stopped                      sleep 20000
[s11127138@localhost ~]$ jobs -l
[1]+  5413 Stopped (signal)         sleep 20000
[s11127138@localhost ~]$
```

3. 請將前題的 `job` 拉到 `foreground` 執行。

```
[s11127138@localhost ~]$ jobs -l
[1]+  5413 Stopped (signal)         sleep 20000
[s11127138@localhost ~]$ fg
sleep 20000
```

4. 請將前題 `job` 暫停執行。

```
[s11127138@localhost ~]$ fg
sleep 20000
^Z
[1]+  Stopped                      sleep 20000
[s11127138@localhost ~]$
```

5. 請將前題 `job` 終止執行。

```
[s11127138@localhost ~]$ jobs -l
[1]+  5413 Stopped                  sleep 20000
[s11127138@localhost ~]$ kill -9 5413
[1]+  Killed                       sleep 20000
[s11127138@localhost ~]$ jobs -l
[s11127138@localhost ~]$
```
